

GOVERNMENT OF JAMMU AND KASHMIR

Civil Registration System

**ANNUAL VITAL STATISTICS BULLETIN
YEAR 2014**

**OFFICE OF THE DIRECTOR GENERAL ECONOMICS AND STSTISTICS
PLANNING AND DEVELOPMENT DEPARTMENT
GOVERNMENT OF JAMMU & KASHMIR**

FOREWORD

Vital Statistics is that branch of Statistics which deals with mankind in aggregate and refers to statistics emanating from civil registration i.e. registration of births and deaths together with other related information. It throws out information for building important indicators & parameters of changes taking place in human population. Demographic indicators such as birth rates, death rates, maternal and mortality rates etc are generated from vital statistics. Vital statistics are of great use to those involved in economic planning, population control and providing socio-economic services to the community and also reflect the health and growth of a community.

The present edition of the Vital Statistics Bulletin contains up-dated information on births, deaths and other related parameters in the State. The state has been able to achieve 66% and 52% registration in respect of births and deaths respectively, indicating that a lot has to be done to achieve 100% of registration. The registration level got remained stagnant due to the floods in J&K during the year 2014.

I place on record my appreciation of the sincere efforts put in by Statistical Officers viz Ajaz Rasool, Mohmmad Afzal Bhat in tabulating/compiling/computerizing and completing the Vital Statistics Bulletin 2014 in time. Moreover, the support by way of providing the requisite information from Police, DSEOs, Revenue and Health officials is highly acknowledged.

I hope this bulletin would be extremely useful to the Planners, Administrators, Policy makers, Research and Academicians

Any Suggestion for the improvement of this document will be appreciated

(R.A. Bandy)
Director General
Economics and Statistics
J&K Govt

VITAL INDEX		<i>4.09</i>	<i>4.10</i>

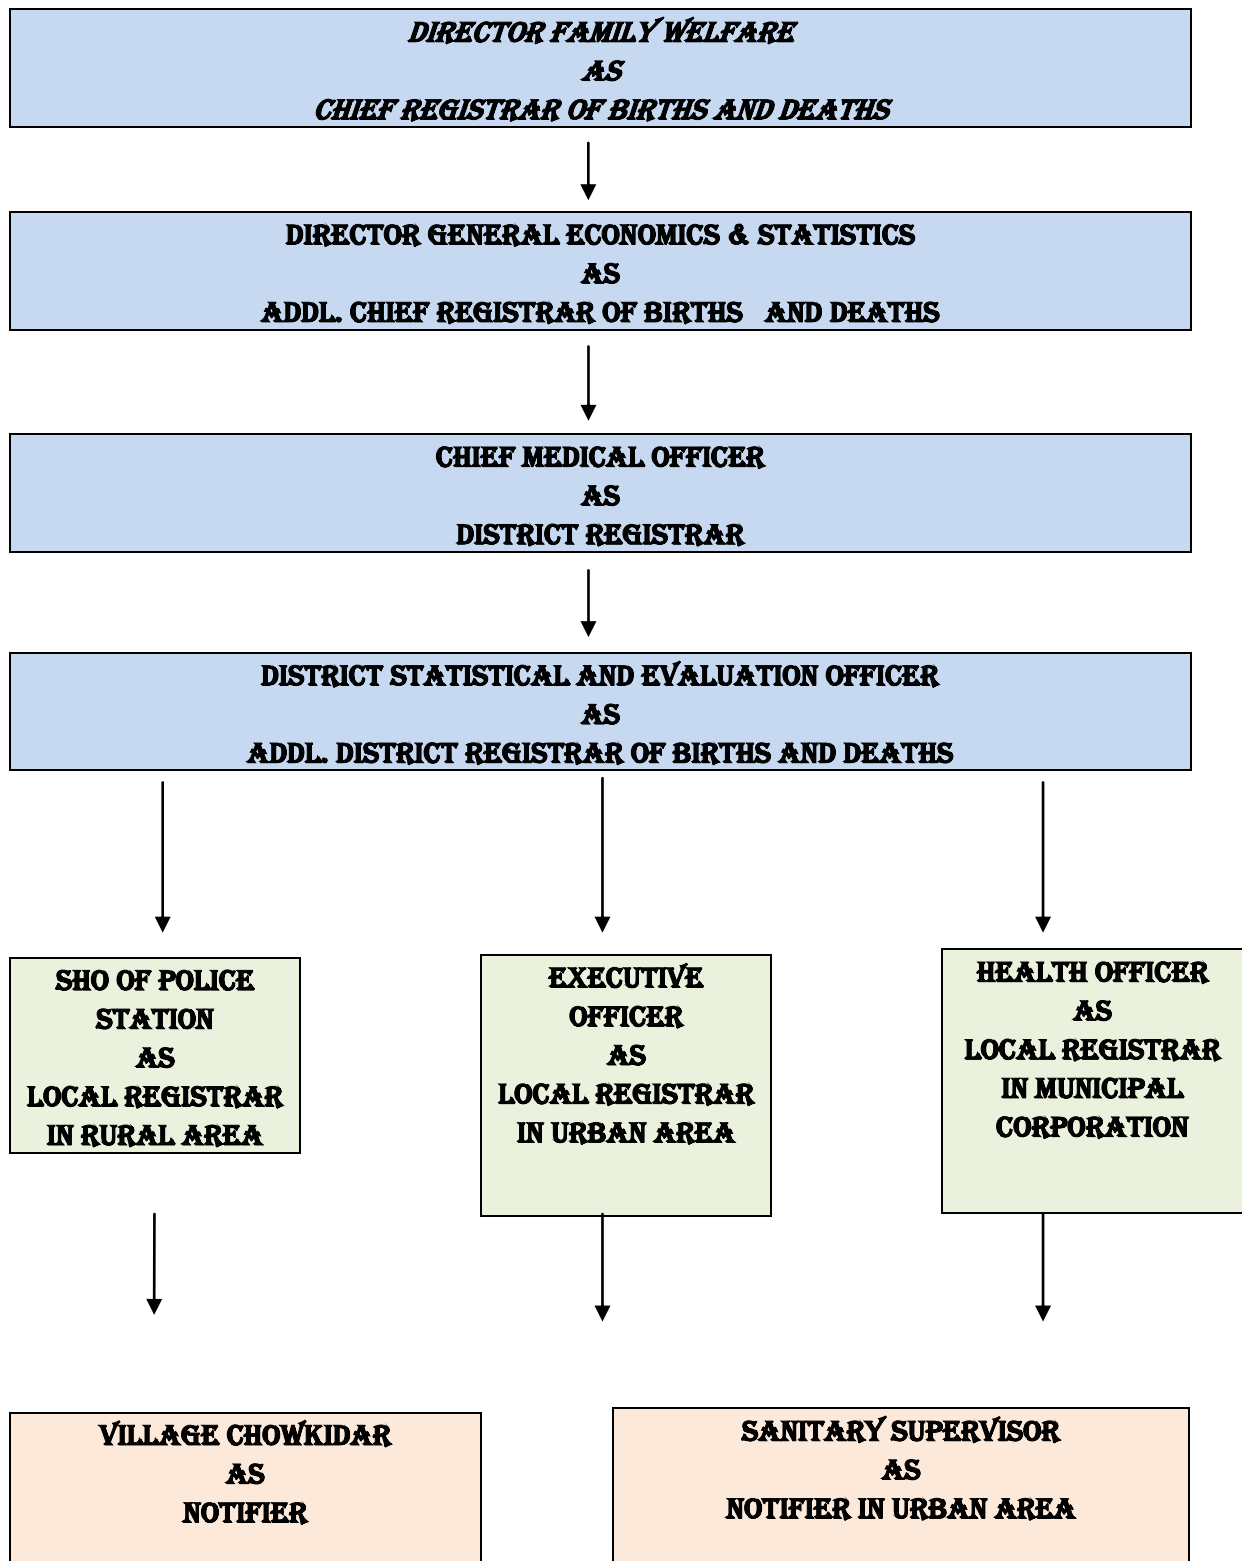

Introduction: *The registration of births and deaths in J&K as in the other parts of the country is carried out under the provisions of the RBD Act, 1969 and may be defined as continuous, permanent and compulsory recording of the occurrence and the characteristics of vital events i.e. births and deaths. The statistics can be used for measuring population change on annual basis which otherwise cannot be obtained from census as it is only a periodic activity. In addition, vital statistics derived from the civil registration system can provide the data from the smallest geographical area which no other data collection can provide. The registration records generate current and continuous statistics which is more accurate than any other method of data collection. The registration records are of great use to the individuals for their value as a legal document and have also administrative uses. The uses of birth and death records and the vital statistics generated from such records are outlined hereunder:-*

1. **Use to individuals:***-The basic registration document has a legal significance to the person concerned. The birth registration records may be required for obtaining proof of age for admission in schools, entry into the service, obtaining a driving license and to obtain passport for foreign travel etc. Similarly, the death registration records may be required for settlement of inheritance, insurance claims, claiming family allowances and other social security benefits etc.*
2. **Use in public administration:***-The birth records are the basis for public health programmes for post-natal care of mother and child and for programmes of vaccination and immunization etc. The death records are the indicators of the existence of infectious and epidemic diseases and the need for controlling measures of the same.*
3. **Statistical uses:** *- Vital statistics enables estimation of the size, structure and geographic distribution of the population for the current year. Vital statistics is also used for formulation of developmental plans e.g. needs for food and nutrition, health services, education facilities etc. Vital statistics are also used in Public Health and Medical Research such as in the study of mortality and trends in the mortality by age sex and cause.*

Organisation:*The scheme on Vital Statistics, known as CRS is being carried out with a network of functionaries drawn from different disciplines viz Police, Local Bodies, Revenue, Health and Economics and Statistics who are doing this job in addition to their normal duties. The Director Family Welfare, MCH & Immunization heading the organization as Chief Registrar of Births and Deaths and Director General, Economics and Statistics as Additional Chief Registrar of Births and Deaths. All the work relating to the registration of births and deaths is carried out by the Director General, Economics and Statistics. The Additional Chief Registrar alone organizes and looks for the various requirements necessary for the implementation of the CRS. Various types of the forms are being printed adequately and timely and supplied to the registration units scattered across the length and breadth of the State. The Flow of the data from the registration units is monitored closely and the review of the same is taken every month. At District level, Chief Medical Officer functions as the District Registrar of Births and Deaths and District Statistical and Evaluation Officer as Additional District Registrar of Births and Deaths. DSEO is the*

main organ at district level, which supplies forms/certificates to the registration units and checks the records and keeps Director General, Economics and Statistics informed with the progress. In rural areas, SHO of Police Stations is the Registrar of Births and Deaths. Chairman Municipal Committees/Municipal Councils act as Registrar in urban areas while as in Municipal Corporations Srinagar/Jammu cities, Health Officers have been designated as Registrars. Executive officer acts as the Registrar in cantonment Board areas. The Registrars in their respective areas submit the Statistical portion of the Birth/ Death/Still Birth forms to this office through Additional District Registrar (DSEOs). The recording of the vital events is done by the Village Chowkidars in rural areas and by Sanitary Supervisors (Jamadars) in urban areas. The grass root level workers record the vital events happening in their areas in the prescribed forms and forward the same to the concerned registration units. This office receives the data from Additional District Registrars of Births and Deaths, Municipal Corporations Srinagar/Jammu and Cantonment Board Badami Bagh Srinagar/Satwari Jammu on monthly basis, where the data is further scrutinized, analyzed, compiled/tabulated and published in the form of Annual Vital Statistics Bulletin and forwarded to the Office of Registrar General India and other concerned quarters.

Administrative Setup and Registration Hierarchy

Geographical Area

The total geographical area of the State is 2.22 lac square kilometers with 1.0 1 lac kilometers on this side of the line of control. The state is divided into three geographical regions and the percentage area of each region is given below.

Jammu	=	19%
Kashmir	=	11%
Ladakh	=	70%

Population Profile:-

The State comprises of 22 revenue Districts, 82 Tehsils, and 497 CD blocks, 4128 Panchayats, 6551 Villages and 86 Towns. There were 66.41 lakh males and 59.01 lakh females as per the census population of 2011. The rural and urban break-up of the population is respectively 91.08 lakh persons and 34.33 lakh persons. The state constitutes 0.99% of the total population of India. Density of population works out to be 124 per square kilometer and as per census 2011, the sex-ratio for the state is 883 females per thousand of males.

Registration Profile:-

At present there are 315 registration units spread across the length and breadth of the State with 229(72.70%) in rural areas and 86(27.30%) in urban areas of the State. District Jammu has the maximum number of registration units i.e 31 followed by Baramulla having 28 registration units. Districts Srinagar and Shopian have the least number of registration units i.e. 5 each followed by district Leh having 7 registration units. There are at least 3000 notifiers in the State i.e. chowkidars and sanitary supervisors, who report the birth, death and still birth events to the registration units. The recording of vital events is performed by the village chowkidars in rural areas and sanitary supervisors in urban areas of the State. The 53 tables generated in the present issue of vital statistics bulletin-2014 have been compiled according to the revamped system and accordingly a total of 154676 birth events have been recorded during the year 2014. 37747 death events have been recorded during the year 2014. Birth events have also been tabulated according to the "place of residence of the mother where she actually resides" out of 154676 birth events 95785 birth events have occurred within the area and 58891 birth events have been recorded outside the area which is clear from tables B-1 and B-2. Similarly, death events have been tabulated according to the "town or village of

residence of deceased" (place where the deceased actually resides). Out of 37747 death events, within the area claims 28953 death events while 8794 death events have occurred outside the area which is clear from tables D-1 and D-2. All statistical tables have been compiled on the basis of monthly reporting forms received from rural and urban registration centers through Additional District Registrar Births and Deaths (District Statistical and Evaluation Officers). The level of registration works out at 66% and 52% for birth and death events respectively for the year 2014. The level of registration remained stagnant due to the floods of year 2014.

The Directorate's endeavor is to minimize the under registration through publicity campaigns and accordingly local registrars have been requested to take necessary steps for registering of missing events. The registration of the child at birth with local registrars is the first pre-requisite on life's path helping in more systematic planning of its resources for development of the children. The registration of births and deaths is also an attempt to count the exact addition in the State's population.

As per the events recorded under Civil Registration System (CRS) during 2014, district Ganderbal tops the crude birth rate with 24.76 births per thousand of population followed by district Samba 23.98 while as the crude birth rate for district Kargil is the lowest viz. 2.62 births per thousand of population followed by district Leh 4.43. As regards the crude death rate district Pulwama claims the highest crude death rate of 4.55 deaths per thousand of population followed by district Udhampur 4.52 and district Kargil claims the lowest crude death rate of 1.35 deaths per thousand of population followed by district Leh 1.74. The crude birth rate and crude death rate for the state taken together respectively have been worked out as **11.66** and **2.85** respectively.

Sex Ratio:-

There were 6640662 males and 5900640 females as per 2011 census in J&K. The sex ratio has been worked out as 883 per thousand of males. Sex ratio as per last census 2001 was 892 per thousand of males. Comparison shows that sex ratio is unfavorable to women as per census 2011.

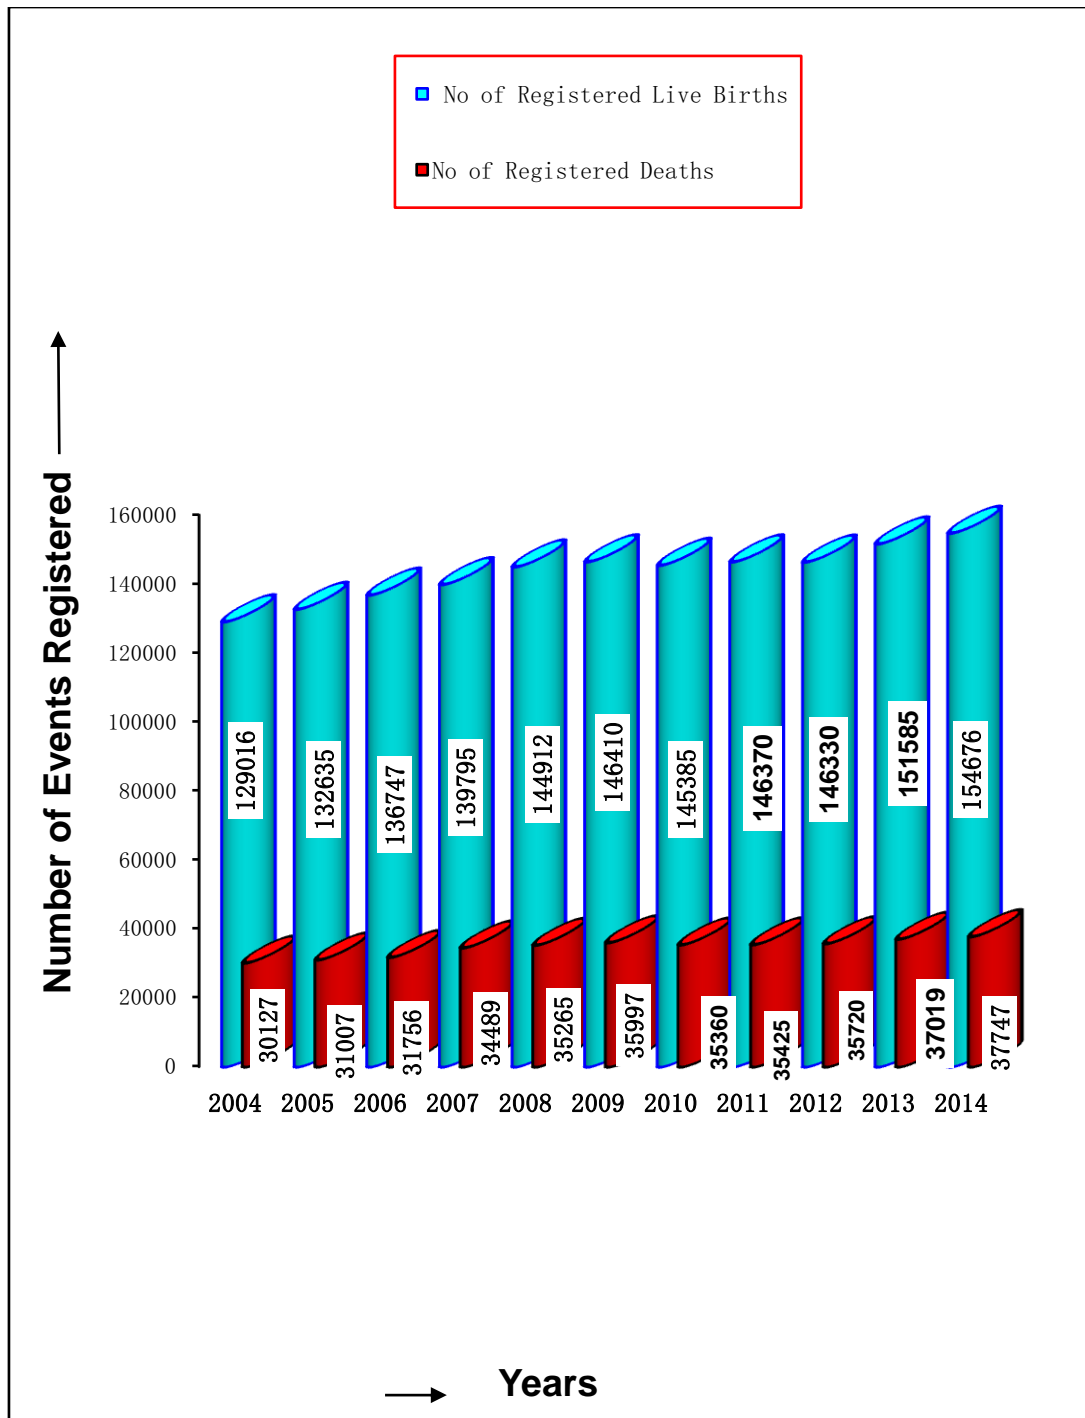

The sex ratio is being closely monitored at all levels. 80883 males and 73843 females were registered during the year 2014 thereby giving sex ratio at birth as 913.

Printing of Forms:-

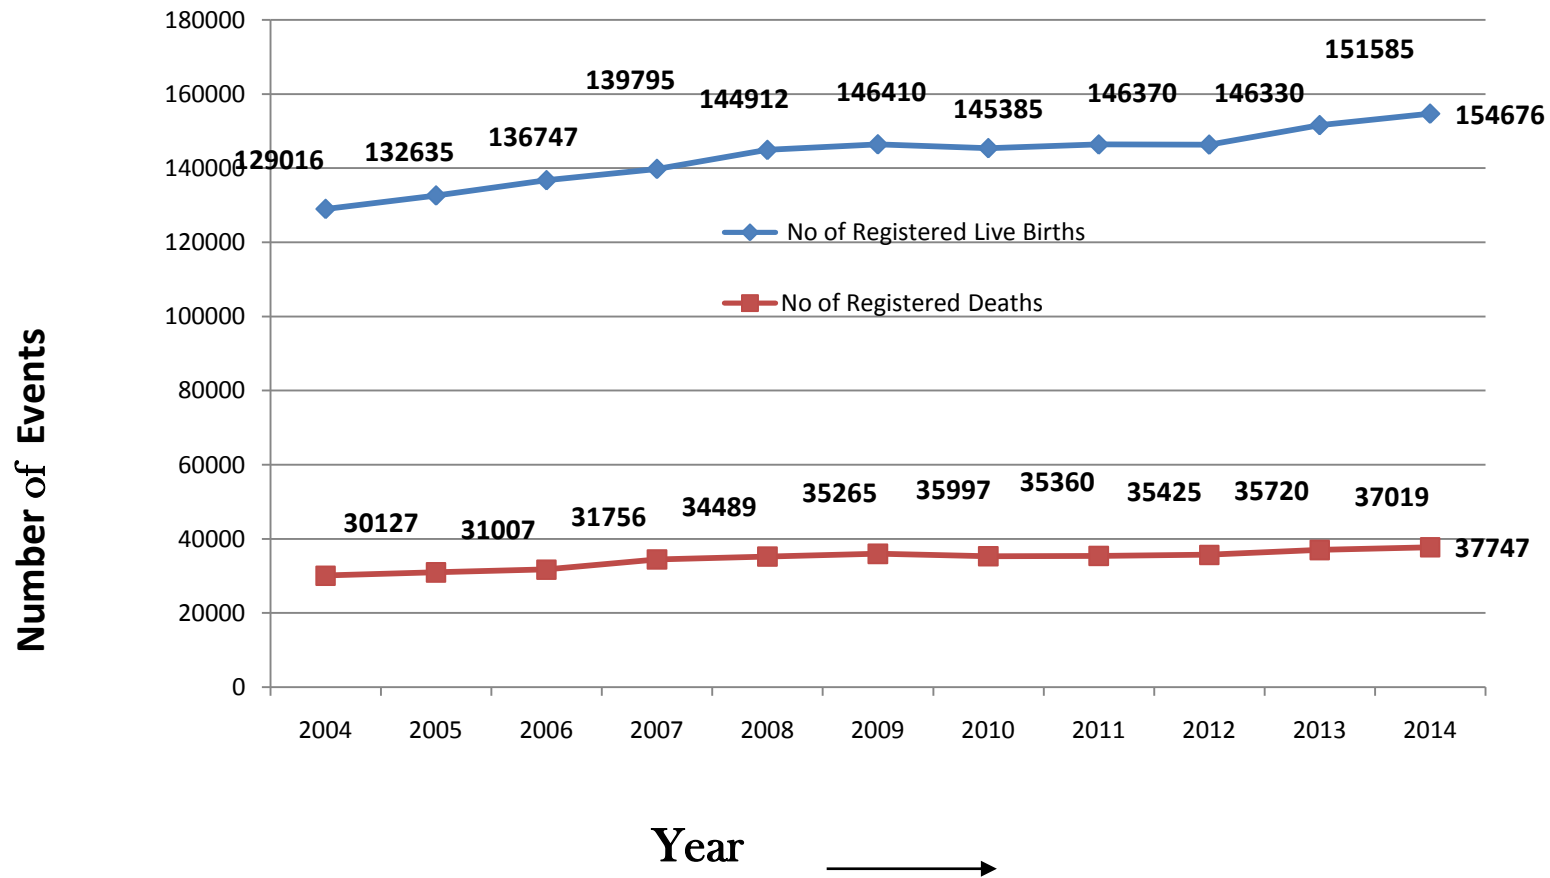

Registration process requires a number of Birth and Death forms/registers. The printed material was supplied to grass root level workers through District Statistical & Evaluation Officers. Sufficient Stationery was made available to all the concerned agencies in advance before 1st January.

RESULTS OF SAMPLE REGISTRATION SYSTEM (SRS) FOR JAMMU & KASHMIR FOR THE YEARS 2012 AND 2013
